

DIDAR

PROJECT "FOR HONOUR"

Are you thinking about how to manage in the Finnish society while respecting your own values and culture, as well as maintaining them?

How does the family honour affect you?

What does honour mean to you?

Are you concerned about your wife / child / sister not behaving honourably?

"Discussions here improved the situation at home as well."

"In a group, we were able to discuss freely about many topics in our mother tongue."

"I was able to talk about things I haven't talked with others."

The honour and face-saving in the eyes of others are important values in all societies. This is why different cultures have invented traditions to gain a good individual or family reputation. It is honourable to all that these traditions are observed without violating anyone's human rights.

If in the name of honour, you have had to limit, control or threaten your family members, it is good to stop to think: with my actions, am I increasing honour or fear? It is never too late to find alternative ways to act for the best of you and your family.

**Our services are
confidential and free
of charge.**

Project For Honour

- helps subjects in honour-related conflict situations
- together searches for different solutions that ensure the human rights of all parties
- offers open and respectful encounters
- organises group activities as well.

Project (2021–2022) is financed by the Ministry of justice.

**If you have suffered from
this kind of threatening,
control or violence,
contact Didar.**
